

A NEW SUGGESTION FOR YOUR SMART HOME

CONCEPT

The evolution of style according to Ekinex

Our designers, with a continuous and refined research, have designed a product conceived to enrich the environment.

A series that brings with it a great innovation, expressed through RGB backlighting and the technical advantages, which will make 20venti a series, doomed to become an icon.

Backlighting is one of the distinctive traits that enhances it and at the same time improves its ergonomic functionality, can be of two types: LED or text/symbols backlit.

This characterises the 20venti series as bespoke, for it can be declined according to tastes and needs.

Geometric shapes and balances

The esthetical style of a product that decorates, characterized by harmonious lines, clean and essential, with accurate and harmonious volumes.

The concept arises from the idea of transforming an object of daily use in a charming piece of interior design.

A design that is not an end-in-itself, but empathic: beautiful indeed, yet functional and intuitive.

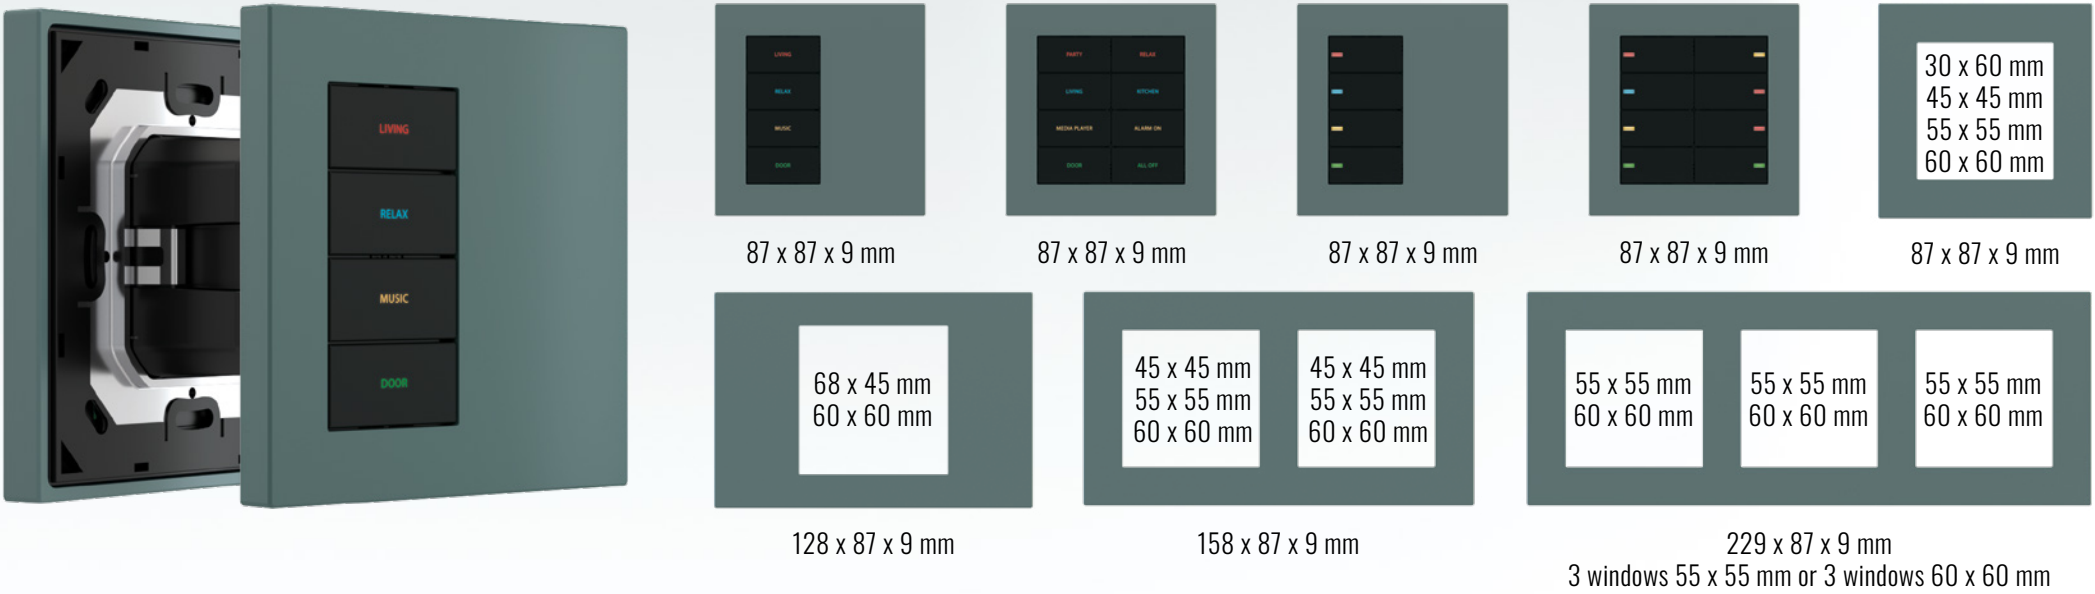

VERSIONS

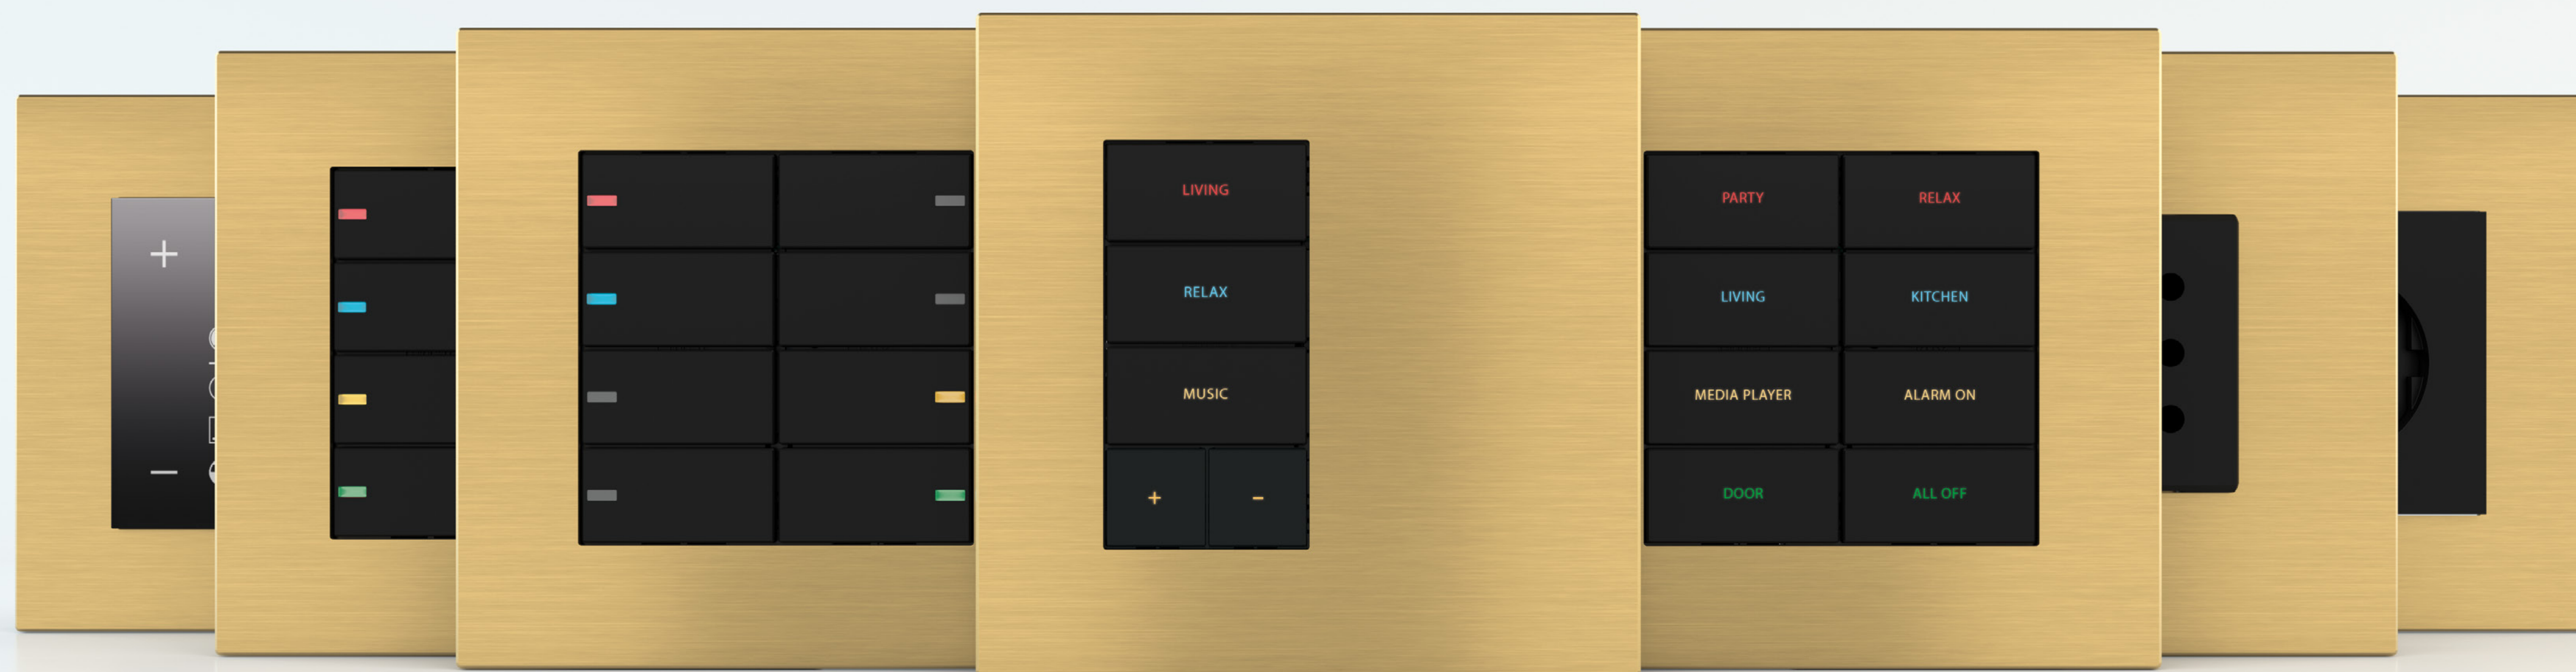

20venti Deep

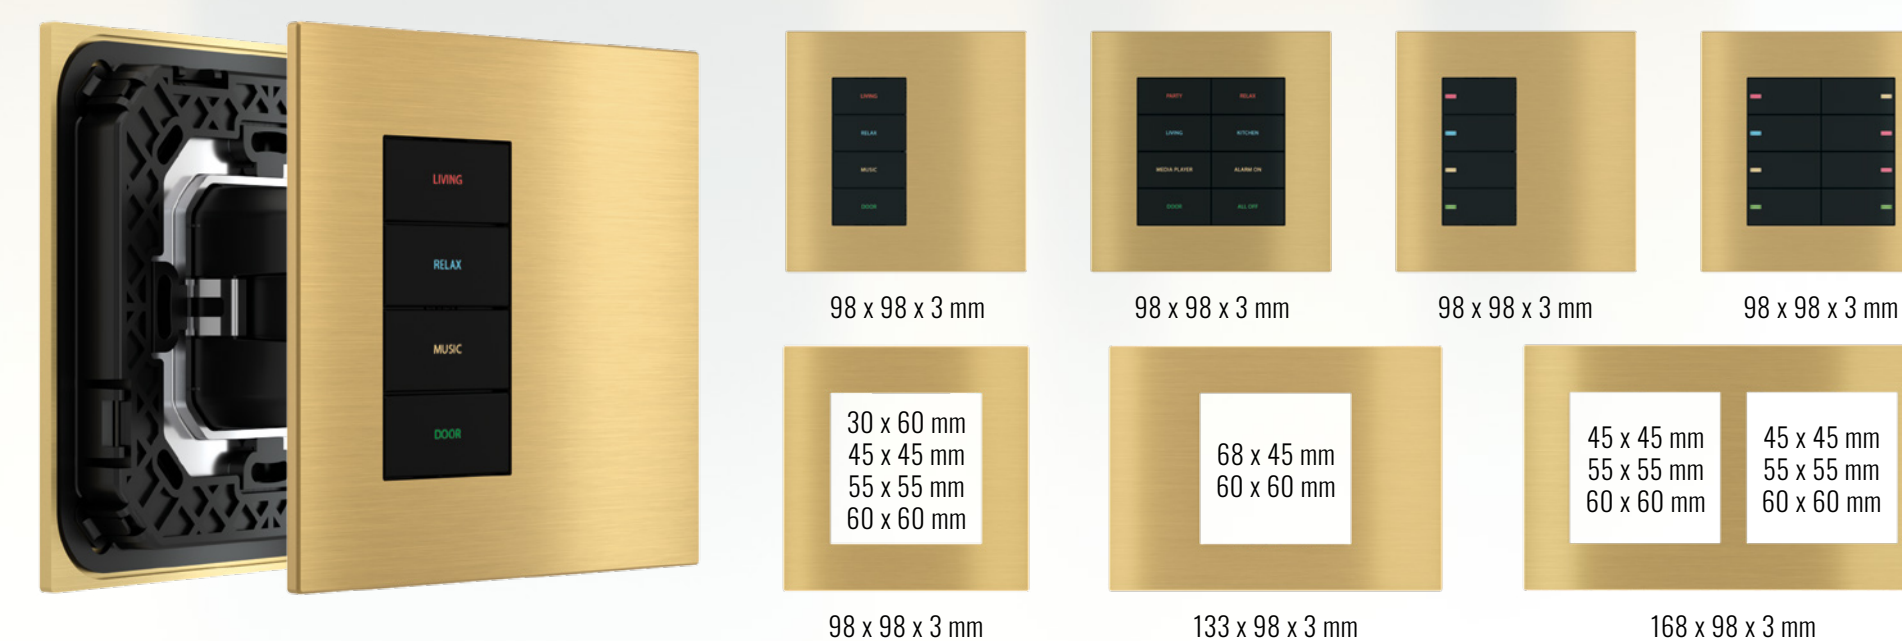

Insight, versatility and continuous growth. The 20venti series in its Deep version has those characteristics that facilitate the identification of the functions right from the very first use. The materials chosen for its finishes are plastic, metal and the nanotechnology Fenix NTM®.

20venti Surface

Essentiality and functionality in a single device. KNX technology combined with a wide range of finishes make the surface version of the 20venti series a contemporary solution that finds its ideal fit in home, office and hotel environments.

4-fold pushbutton
with backlit
text/symbols
and proximity sensor

Main features

- 4 fold version
- Possibility to configure up to 4 independent functions
- RGB LED for each freely programmable button
- Integrated temperature sensor
- Integrated proximity sensor
- Room thermostat function
- Connection to bus line with KNX terminal block
- Wall-mounting installation on round or square wall box
- IP20 protection degree (installed)

8-fold pushbutton
with backlit
text/symbols
and proximity sensor

Main features

- 8 fold version
- Possibility to configure up to 8 independent functions
- RGB LED for each freely programmable button
- Integrated temperature sensor
- Integrated proximity sensor
- Room thermostat function
- Connection to bus line with KNX terminal block
- Wall-mounting installation on round or square wall box
- IP20 protection degree (installed)

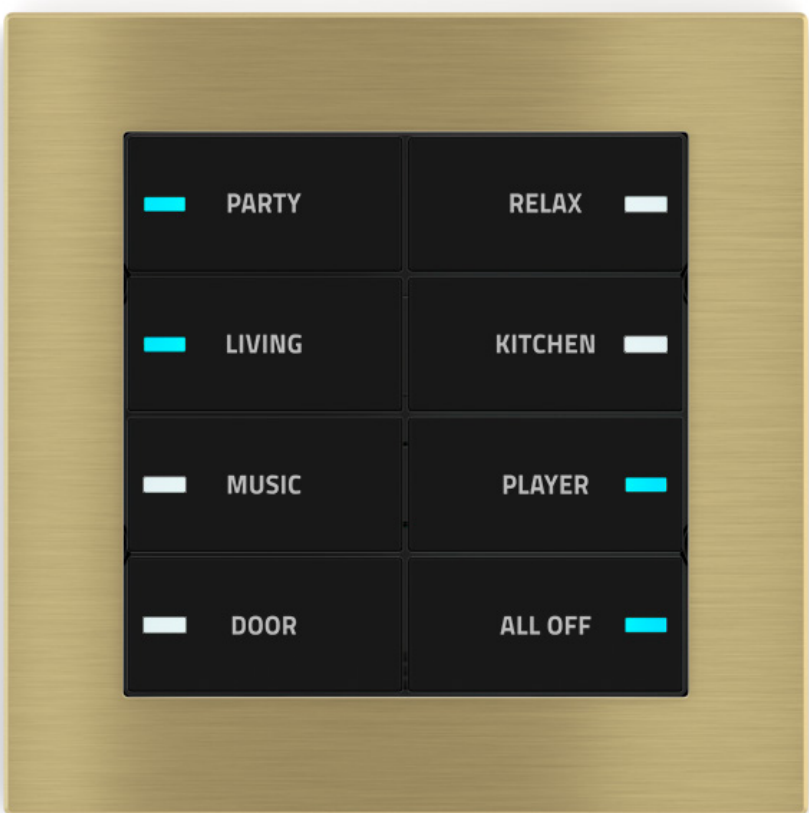

4-fold pushbutton
with led

Main features

- 4 fold version
- Possibility to configure up to 4 independent functions
- RGB LED for each freely programmable button
- Integrated temperature sensor
- Room thermostat function
- Connection to bus line with KNX terminal block
- Wall-mounting installation on round or square wall box
- IP20 protection degree (installed)

with led

Main features

- 8 fold version
- Possibility to configure up to 8 independent functions
- RGB LED for each freely programmable button
- Integrated temperature sensor
- Room thermostat function
- Connection to bus line with KNX terminal block
- Wall-mounting installation on round or square wall box
- IP20 protection degree (installed)

5-fold pushbutton
with backlit
text/symbols
and proximity sensor

Main features

- 5 fold version
- Configuration of up to 3 independent functions plus 2 paired keys for adjustments
- RGB LED for each freely programmable button
- Integrated temperature sensor
- Integrated proximity sensor
- Room thermostat function
- Connection to bus line with KNX terminal block
- Wall-mounting installation on round or square wall box
- IP20 protection degree (installed)

10-fold pushbutton
with backlit
text/symbols
and proximity sensor

Main features

- 10 fold version
- Configuration of up to 6 independent functions plus 4 paired keys for adjustments
- RGB LED for each freely programmable button
- Integrated temperature sensor
- Integrated proximity sensor
- Room thermostat function
- Connection to bus line with KNX terminal block
- Wall-mounting installation on round or square wall box
- IP20 protection degree (installed)

MATERIALS and FINISHINGS

Plastic, Metal, Fenix NTM®

Available in 3 different materials.

Metal, brushed and painted aluminium, which creates a precious finish; obtained from a laborious processing with numeric controller's machine. Fenix NTM®, an innovative Nano-tech material, ultra-matt and soft touch, which combines refined aesthetic solutions with cutting-edge technology's performances. Lastly, plastic, in its noblest version.

Stylecase

The Stylecase is designed to showcase the Ekinex® series, evaluate materials and colours of the finishes, assess the effect of various finishes on walls with different colours. It is fitted with 4 drawers (one of which is equipped with functional devices) equipped with push buttons and thermostats in demo version. The Stylecase also includes a practical colour scheme and sampling, consisting of removable buttons. There is also a pocket to store catalogues and documents. The handle allows easy transport.

Code: **EK-SC1-01**

Stylebox

Stylebox 20venti is a display case that houses a push-button with backlighting function visible, so you can appreciate both the aesthetic effect and the functionality. It is equipped with additional push buttons and plates in different colours to evaluate the different chromatic and aesthetic solutions available.

Code: **EK-SB4-20**
